

Mental Health Current Awareness Update

December 2023

Welcome to the monthly **Mental Health Current Awareness Alert (MHCAU)**, produced by **UKHSA Knowledge and Library Services**. The purpose of this update is to provide you with the latest, best evidence about mental health, to help you make informed decisions.

If you have any queries, please contact us at libraries@ukhsa.gov.uk, and if you would like to request a literature search, please use the **Knowledge and Library Services Enquiries Portal**.

Please note that not all the articles and resources referred to in this alert are freely available. Some articles may require an Athens username and password. For further information on Athens accounts please visit [here](#). If you are not eligible to access our library services, then you may want to approach your **local health library service**.

We do not accept responsibility for the availability or reliability of the items of content included in this alert and their inclusion is not an endorsement of any views that may be expressed.

Mental health

What factors facilitate partnerships between higher education and local mental health services for students? A case study collective

30 Dec 2023 - British Medical Journal

Background Higher education institutions face challenges in providing effective mental health services for diverse student needs. In the UK, discrepancies between healthcare and education service provision create barriers for students and require stronger alignment through partnerships

Co-designing a nature-based intervention to promote postnatal mental health for mothers and their infants: a complex intervention development study in England

28 Dec 2023 - British Medical Journal

Objectives There is burgeoning evidence for the potential of nature-based interventions to improve wellbeing. However, the role of nature in enhancing maternal mental health, child development and early relationships remains relatively unexplored. This study aimed to develop a co-designed nature-based intervention to improve postnatal mothers' and infants' wellbeing

Presidential Address: Bringing the Village to the Children: Child Psychiatrists' Role in the Transformation of Children's Mental Health

27 Dec 2023 - Elsevier ScienceDirect

Publication date: January 2024 Source: Journal of the American Academy of Child & Adolescent Psychiatry, Volume 63, Issue 1 Author(s): Tami D. Benton

The Impact of Childhood Mental Health and Substance Use on Methylation Aging Into Adulthood

27 Dec 2023 - Elsevier ScienceDirect

Publication date: Available online 27 December 2023 Source: Journal of the American Academy of Child & Adolescent Psychiatry Author(s): Shaunna L. Clark, Ellen W. McGinnis, Min Zhao, Linying Xie, Garrett T. Marks, Karolina A. Aberg, Edwin J.C.G. van den Oord, William E. Copeland

Poorer subjective mental health among girls: Artefact or real? Examining whether interpretations of what shapes mental health vary by sex

27 Dec 2023 - PLOS ONE

by Susan P. Phillips, Fiona Costello, Naomi Gazendam, Afshin Vafaei Background Despite reporting poorer self-rated mental health (SRMH) than boys, girls exhibit greater resilience and academic achievement, and less risk taking or death by suicide

Development of the clinical competency assessment scale in child and adolescent mental health nursing

26 Dec 2023 - John Wiley & Sons

Journal of Psychiatric and Mental Health Nursing, EarlyView.

Effects of volunteering over six months on loneliness, social and mental health outcomes among older adults: The HEAL-HAO Dual Randomized Controlled Trial

25 Dec 2023 - Elsevier

Loneliness – defined as a discrepancy between the desired and the perceived levels of social contacts – has been found to have detrimental effects on mental and physical well-being in all age groups.^{1–7} In many countries, public health initiatives to reduce loneliness had already been implemented prior to the COVID-19 pandemic; however, physical distancing during the pandemic escalated the need

Editorial: The need for more effective school-based youth mental health interventions

23 Dec 2023 - John Wiley & Sons

Child and Adolescent Mental Health, EarlyView.

Improving mental health care for sexual and gender minorities: Insights and strategies for pharmacists

23 Dec 2023 - National Institutes of Health (NIH)

In an effort to expedite the publication of articles, AJHP is posting manuscripts online as soon as possible after acceptance. Accepted manuscripts have been peer-reviewed and copyedited, but are posted online before technical formatting and author proofing

Impact of heat on mental health emergency visits: a time series study from all public emergency centres, in Curitiba, Brazil

22 Dec 2023 - British Medical Journal

Objectives Quantify the risk of mental health (MH)-related emergency department visits (EDVs) due to heat, in the city of Curitiba, Brazil. Design Daily time series analysis, using quasi-Poisson combined with distributed lag non-linear model on EDV for MH disorders, from 2017 to 2021. Setting All nine emergency centres from the public health system, in Curitiba

Patterns of posttraumatic stress symptoms, their predictors, and comorbid mental health symptoms in traumatized Arabic-speaking people: A latent class analysis

22 Dec 2023 - PLOS ONE

by Jana Stein, Max V?hringer, Birgit Wagner, Nadine Stammel, Maria B?tche, Christine Knaevelsrud Many people from the Middle East and North Africa (MENA) have experienced traumatic events due to human rights abuses, violence, and conflict in the region, with potential psychological consequences including symptoms of posttraumatic stress and comorbid mental health problems

Mental health status and coping strategies of Chinese university students during the COVID-19 pandemic: A rapid review

22 Dec 2023 - PLOS ONE

by Wenjie Luo, Jalal Mohammed Since the coronavirus (COVID-19) outbreak in December 2019, students have been under unparalleled psychological stress worldwide. As part of its prevention and control strategies, the Chinese Ministry of Education proposed online teaching activities for universities

The Colour of Madness: Mental Health and Race in Technicolour Edited by Samara Linton and Rianna Walcott Pan Macmillan. 2022. £16.99 (hb). 336 pp. ISBN 9781529088496

22 Dec 2023 - BJPsych

Engaging Historically Black Undergraduate Students in Geriatric Mental Health

21 Dec 2023 - Elsevier

The American Association for Geriatric Psychiatry (AAGP) and its official journal, The American Journal of Geriatric Psychiatry (AJGP), are committed to advancing health equity to the most marginalized older adults both globally and within the United States

Relationship between mental health literacy and professional psychological help-seeking attitudes in China: a chain mediation model

21 Dec 2023 - Biomed Central

Mental health literacy is considered an important factor in promoting professional psychological help-seeking attitudes. However, it is important to clarify the emotional and behavioral factors that underlie t...

A mixed methods systematic review of mental health self-care strategies for Arabic-speaking refugees and migrants

20 Dec 2023 - Biomed Central

Self-care strategies can improve mental health and wellbeing, however, the evidence on preferred strategies among Arabic-speaking refugees and migrants is unclear. This mixed methods systematic review aimed to...

Associations of academic environment, lifestyle, sense of coherence and social support with self-reported mental health status among dental students at a university in Brazil: a cross-sectional study

19 Dec 2023 - British Medical Journal

Objectives The study evaluated the association of academic environment, lifestyle, sense of coherence (SOC) and social support with self-reported mental health status among dental students. **Design** Secondary analysis of data from a cross-sectional, questionnaire-based survey conducted from August to October 2018

Understanding the uptake of virtual care for first and return outpatient appointments in child and adolescent mental health services: a mixed-methods study

19 Dec 2023 - British Medical Journal

Objective To describe patterns of virtual and in-person outpatient mental health service use and factors that may influence the choice of modality in a child and adolescent service. **Design** A pragmatic mixed-methods approach using routinely collected administrative data between 1 April 2020 and 31 March 2022 and semi-structured interviews with clients, caregivers, clinicians and staff

Sean Duggan OBE to leave NHS Confederation's Mental Health Network

19 Dec 2023 - NHS Confederation

Mental Health Network chief executive set for pastures new following his appointment as chair of Sussex Partnership NHS Foundation Trust.

Mental Health Apps for Children and Adolescents: A Clinician-Friendly Review

18 Dec 2023 - Elsevier ScienceDirect

Publication date: Available online 18 December 2023
Source: Journal of the American Academy of Child & Adolescent Psychiatry
Author(s): Stephen M. Schueller, Akash R. Wasil, John Bunyi, Robert J. DeRubeis, John R. Weisz

Relational continuity may give better clinical outcomes in patients with serious mental illness – a systematic review

18 Dec 2023 - Biomed Central

Continuity of care is considered important for results of treatment of serious mental illness (SMI). Yet, evidence of associations between relational continuity and different medical and social outcomes is spa...

Effect of adverse perinatal outcomes on postpartum maternal mental health in low-income and middle-income countries: a protocol for systematic review

15 Dec 2023 - British Medical Journal

Introduction More than three-fourths of adverse perinatal outcomes (preterm, small for gestational age, low birth weight, congenital anomalies, stillbirth and neonatal death) occur in low-income and middle-income countries. These adverse perinatal outcomes can have both short-term and long-term consequences on maternal mental health

Implementing a complex mental health intervention in occupational settings: process evaluation of the MENTUPP pilot study

15 Dec 2023 - British Medical Journal

Background According to the Medical Research Council (MRC) framework, the theorisation of how multilevel, multicomponent interventions work and the understanding of their interaction with their implementation context are necessary to be able to evaluate them beyond their complexity

Correction: Prevalence of mental health problems among children with long COVID: A systematic review and meta-analysis

14 Dec 2023 - PLOS ONE

Psychosocial safety climate (PSC) and working conditions, predictors of mental health and antidepressant and opioid use in Australia: a study protocol for longitudinal data linkage

14 Dec 2023 - British Medical Journal

Introduction Work-related stress is a social determinant of global health that represents a huge cost to workers' health and reduces work performance. In Australia, mental well-being is a pressing national issue—with one in five Australians experiencing mental disorders. Antidepressants are a first-line medication commonly used to treat mental disorders

Debate: Social media content moderation may do more harm than good for youth mental health

13 Dec 2023 - John Wiley & Sons

Child and Adolescent Mental Health, EarlyView.

A Nominal Group Technique to finalise Safewards Secure model and interventions for forensic mental health services

13 Dec 2023 - John Wiley & Sons

Journal of Psychiatric and Mental Health Nursing, EarlyView.

The mental health of officials who regularly examine child sexual abuse material: strategies for harm mitigation

13 Dec 2023 - Biomed Central

The current study aims to better understand the mental health and subjective well-being of investigators and forensic examiners exposed to child sexual abuse material (CSAM) by examining which components of th...

Severe mental illness, race/ethnicity, multimorbidity and mortality following COVID-19 infection: nationally representative cohort study – ADDENDUM

13 Dec 2023 - BJPsych

Development of indicators for avoidable emergency medical service calls by mapping paramedic clinical impression codes to ambulatory care sensitive conditions and mental health conditions in the UK and Canada

12 Dec 2023 - British Medical Journal

Objective Paramedic assessment data have not been used for research on avoidable calls. Paramedic impression codes are designated by paramedics on responding to a 911/999 medical emergency after an assessment of the presenting condition. Ambulatory care sensitive conditions (ACSCs) are non-acute health conditions not needing hospital admission when properly managed

COVID-19 pandemic and mental health among Hispanic/Latino/a immigrants in the USA: protocol for a scoping review

12 Dec 2023 - British Medical Journal

Introduction The COVID-19 pandemic has had drastic effects on worldwide mental health and laid bare health disparities and inequities among marginalised groups and racial/ethnic minoritised communities in the USA. This is especially the case among Hispanic/Latino/a immigrants who face numerous structural and socioeconomic barriers to well-being

Space for youth mental health—coercive measure use before and after architectural innovation at a department of child and adolescent psychiatry

12 Dec 2023 - John Wiley & Sons

Child and Adolescent Mental Health, EarlyView.

Research Opportunity: Mental Health Recovery and Punjabi Young People

12 Dec 2023 - Mental Health Providers Forum

University of Surrey are currently seeking to interview Punjabi young people (16-25 years old) who are willing to discuss their mental health journey and what recovery means to them as part of a project led by Aneisha, a Punjabi trainee clinical psychologist, completing research into Punjabi Young People and Mental Health Recovery, The interview will... Examining the role of community resilience and social capital on mental health in public health emergency and disaster response: a scoping review

12 Dec 2023 - Biomed Central

The ability of the public to remain psychologically resilient in the face of public health emergencies and disasters (such as the COVID-19 pandemic) is a key factor in the effectiveness of a national response ...

Improving mental health following multiple disasters in Australia: a randomized controlled trial of the Skills for Life Adjustment and Resilience (SOLAR) programme

11 Dec 2023 - National Institutes of Health (NIH)

Background: The mental health impacts of climate change-related disasters are significant. However, access to mental health services is often limited by the availability of trained clinicians. Although building local community capability for the mental health response is often prioritised in policy settings, the lack of evidence-based programs is problematic

Borderline personality disorder and the diagnostic co-occurrence of mental health disorders and somatic diseases: A controlled prospective national register-based study

11 Dec 2023 - John Wiley & Sons

Acta Psychiatrica Scandinavica, EarlyView.

Development of mental health first-aid guidelines for suicide risk: a Delphi expert consensus study in Argentina and Chile

11 Dec 2023 - Biomed Central

Suicide continues to pose a significant global public health challenge and ranks as one of the leading causes of death worldwide. Given the prevalence of suicide risk in the community, there is a significant l...

[Correspondence] Moroccan earthquake: mental health challenges and resilience strategies

10 Dec 2023 - The Lancet

On Sep 8, 2023, a 6.8-magnitude earthquake hit the High Atlas Mountains, in the central region of Morocco. It was the most devastating earthquake in the country for decades, resulting in nearly 3000 deaths and thousands more people injured

Employing telepsychiatry services to assess the prevalence and identify mental health disorders using the PHQ-9 and GAD-7 in resource-constrained regions of Dadar Mansehra, Pakistan: an observational cross-sectional study

10 Dec 2023 - British Medical Journal

Objective This study aims to measure the prevalence of mental health disorders in low-resource settings through telepsychiatry and evaluate data from Pakistan's Sehat Kahani nurse-assisted online clinics serving low-income communities. This will help to understand the magnitude and nature of the demand for contextual therapies to promote mental health

Family-focused intervention to promote adolescent mental health and well-being in Moldova and North Macedonia (FLOURISH): feasibility study protocol

10 Dec 2023 - British Medical Journal

Introduction Family-Focused Adolescent & Lifelong Health Promotion (FLOURISH) project will adapt, implement and evaluate a programme to support adolescent mental health and well-being through strategies, such as strengthening parenting practices, adolescent-caregiver relationships, adolescent and parent socioemotional skills, and social support

Relationship between mental health, sleep status and screen time among university students during the COVID-19 pandemic: a cross-sectional study

09 Dec 2023 - British Medical Journal

Objective On 20 July 2021, after the outbreak of COVID-19 at Nanjing Lukou International Airport, several universities started closed management and online teaching. This had a large impact on students' daily life and study, which may lead to mental health problems

Subjective Social Status as a Predictor of Physical and Mental Health among Early Midlife Adults in the United States: Appraising the Role of Gender

09 Dec 2023 - Sage Journals

Society and Mental Health, Ahead of Print. Literature indicates that subjective social status (SSS) is a robust predictor of health outcomes net of objective social status (OSS). However, research that has considered gender in the relationship between SSS and health is limited

Editorial: Pandemics Interact With and Amplify Child Mental Health Disparities: Further Lessons From COVID-19

08 Dec 2023 - Elsevier ScienceDirect

Publication date: Available online 8 December 2023Source: Journal of the American Academy of Child & Adolescent PsychiatryAuthor(s): Niranjan S. Karnik

Effects of brief cognitive behavioral therapy on mental health in substance-related disorder: a randomized controlled trial

08 Dec 2023 - Biomed Central

Population and aging are major contributing factors influencing the increase in substance use disorder (SUD), which in itself affects mental health, particularly anxiety and depression. Cognitive behavioral th...

Editorial: It's Not Just a Phase, and We Know What to Do: Children With Early Onset Mental Health Concerns Deserve Care Now

07 Dec 2023 - Elsevier ScienceDirect

Mental health service research, trauma-informed care and freedom of information requests

07 Dec 2023 - John Wiley & Sons

Journal of Psychiatric and Mental Health Nursing, EarlyView.

Caregiving and receiving experiences in UK community mental health services during COVID-19 pandemic restrictions: A qualitative, co-produced study

07 Dec 2023 - John Wiley & Sons

Journal of Psychiatric and Mental Health Nursing, EarlyView.

Trends in psychotherapy utilization for perinatal mental health 2008–2020

06 Dec 2023 - John Wiley & Sons

Acta Psychiatrica Scandinavica, EarlyView.

School and class closures and adolescent mental health during the second and later waves of the COVID-19 pandemic in Finland: a repeated cross-sectional study

06 Dec 2023 - Biomed Central

Since the start of the COVID-19 pandemic, several studies have shown deterioration of adolescents' mental health when comparing periods before and after the start of the pandemic when there were national schoo...

Assessment of psychological terror and its impact on mental health and quality of life in medical residents at a reference medical center in Mexico: A cross-sectional study

06 Dec 2023 - PLOS ONE

by V?ctor Manuel Enriquez Estrada, Neftali Eduardo Antonio-Villa, Omar Yaxhemen Bello-Chavolla, Carlos Fredy Cuevas-Garc?a, Pedro Luis Vargas Guti?rrez, Irma Sau-Yen Corlay Noriega, Luis Rey Garc?a-Cort?s Background Mobbing, particularly in medical residencies, can lead to psychological terror with lasting mental and physical health consequences

The experiences, views and beliefs of emerging adults and their carers of receiving adult mental health services in the UK: a systematic review and meta-ethnography

06 Dec 2023 - MAG ONLINE LIBRARY

British Journal of Mental Health Nursing, Volume 12, Issue 4, Page 1-15, November 2023.

Deep Learning and Geriatric Mental Health

05 Dec 2023 - Elsevier

Geriatric psychiatry is a study of human and medical complexity. Mental health in late-life represents the cumulative outcome of a number of factors that include changes to the brain (both age-related and pathological), changes in the body, evolving social circumstances, and psychological factors (both protective and detrimental). It can be impacted by biological determinants present at birth (e

Perspective on "Meeting the Rising Mental Health Needs of an Aging Population," a workshop of the National Academies of Science, Engineering, and Medicine.

05 Dec 2023 - Elsevier

Mental disorders in older adults are a leading cause of suffering and disability in the nation, much of it avoidable. These disorders are common, impairing social functioning,

undermining adherence to co-prescribed medical treatments, increasing the risk for loss of independence, and hastening mortality

A realist interview study of a participatory public mental health project “#KindnessByPost”

04 Dec 2023 - Biomed Central

#KindnessByPost (KbP) is a participatory public health initiative in which people anonymously send and receive cards containing messages of goodwill with others also taking part in the programme. Quantitative ...

Climate Change and Mental Health—Time to Act Now

01 Dec 2023 - The JAMA Network

This Viewpoint discusses the lack of research on the impact of climate events on mental health, climate change–related inequalities in low- and middle-income countries, and the immediate need to act now.

Mental Health in a Changing Planet

01 Dec 2023 - The JAMA Network

This Viewpoint discusses climate change and its effect on mental health.

Perinatal Mental Health Outcomes Following Natural Disasters

01 Dec 2023 - The JAMA Network

This Viewpoint discusses mental health outcomes associated with natural disaster–related stressors during the perinatal period.

Debate: The prevention of psychosis in child and adolescent mental health services

30 Nov 2023 - John Wiley & Sons

Child and Adolescent Mental Health, EarlyView.

[\[back to top\]](#)

Prevention and mental well-being

Mindful self-care and mental well-being of university health educators and professionals in Hail Region, Saudi Arabia

25 Dec 2023 - National Institutes of Health (NIH)

CONCLUSIONS: The study affirmed the relationship between mindful self-care behaviors and mental well-being. Engaging in self-care practices regularly and frequently can develop one's well-being.

Exploring the Role of Marianismo and Loneliness in Latinas' Physical and Mental Well-Being

20 Dec 2023 - National Institutes of Health (NIH)

The goal of this study is to better understand the role of social relationships and traditional gender norms in Latina health. Utilizing Hawkey and Cacioppo's theoretical model of

loneliness and health as a framework, loneliness is proposed as a key component in the relationship between the Latina gender norm of marianismo and health

Impact of basic psychological support on stigma and the mental well-being of people with disabilities due to leprosy and lymphatic filariasis: a postintervention evaluation study

20 Dec 2023 - National Institutes of Health (NIH)

CONCLUSIONS: This study provides additional evidence on the proof of concept of BPS-N.

Impact of basic psychological support on stigma and mental well-being of people with disabilities due to leprosy and lymphatic filariasis: a proof-of-concept study

20 Dec 2023 - National Institutes of Health (NIH)

CONCLUSIONS: Psychological peer support using the BPS-N guideline appears effective in reducing stigma and improving mental well-being and can be operationalised. However, this should be confirmed through a randomised controlled trial.

Composite healthy lifestyle, socioeconomic deprivation, and mental well-being during the COVID-19 pandemic: a prospective analysis

19 Dec 2023 - National Institutes of Health (NIH)

The adverse psychological and social impacts of COVID-19 pandemic are well characterized, but the role of composite, modifiable lifestyle factors that may interact to mitigate these impacts is not. The effect of socioeconomic deprivation on these lifestyle risks also remains unclear

Elite athletes' mental well-being and life satisfaction: a study of elite athletes' resilience and social support from an Asian unrecognised National Olympic Committee

12 Dec 2023 - National Institutes of Health (NIH)

CONCLUSIONS: Implications (based on the findings) are discussed in order to provide insights for policy makers or coaches how to promote elite athletes' mental well-being.

Comment on Marsigliante et al. Effects on Children's Physical and Mental Well-Being of a Physical-Activity-Based School Intervention Program: A Randomized Study. Int. J. Environ. Res. Public Health 2023, 20, 1927

08 Dec 2023 - National Institutes of Health (NIH)

We conducted a critical review of the article "Effects on Children's Physical and Mental Well-Being of a Physical-Activity-Based School Intervention Program: A Randomized Study", published in the International Journal of Environmental Research and Public Health in 2023 as part of the Special Issue "Psychomotricity and Physical Education in School Health"

Mental, physical, and social well-being and quality of life in healthy young adult twin pairs discordant and concordant for body mass index

06 Dec 2023 - PLOS ONE

by Sakris K. E. Kupila, Bram J. Berntzen, Maheswary Muniandy, Aila J. Ahola, Jaakko Kaprio, Aila Rissanen, Kirsi H. Pietiläinen Objective The relationship between obesity and mental health is complex and is moderated by the level of obesity, age, sex, and social and genetic factors

'Boomerang' moves and young adults' mental well-being in the United Kingdom

06 Dec 2023 - National Institutes of Health (NIH)

CONCLUSION: Although cross-sectional results from the UK have shown that the mental health of young adults living with parents is worse than that of young adults living independently, we found no evidence that returning to the parental home was associated with a deterioration in young adults' mental health

Depression

How does subjective social status at school at the age of 15 affect the risk of depressive symptoms at the ages of 18, 21, and 28? A longitudinal study

29 Dec 2023 - PLOS ONE

by Marie Kj?rgaard Lange, Vivi Just-N?rregaard, Trine N?hr Winding Background Young people's mental health is declining. Depression is a public disease which is increasing internationally, and in Denmark an increase is seen especially among young people

Hypertension, socioeconomic status and depressive and anxiety disorders: a cross-sectional study of middle-aged and older Chinese women

28 Dec 2023 - British Medical Journal

Objectives To investigate the association of hypertension with depressive and anxiety disorders in middle-aged and older Chinese women, and to further assess whether the association was influenced by socioeconomic status (SES). Design Nationwide cross-sectional study. Setting Six provinces of the eastern, central and western regions of China

Time trends in self-reported depressive symptoms, prescription of antidepressants, sedatives and hypnotics and the emergence of social media among Norwegian adolescents

27 Dec 2023 - PLOS ONE

by Lars Lien, Tore Bonsaksen, Tonje Holte Stea, Annette L?vheim Kleppang, Anne Mari Steigen, Marja Leonhardt Background Research has shown increased mental health problems and use of prescription drugs among adolescents in recent years and social media use has been linked to poorer mental health. However, trend studies concerning these topics are scarce

Do depression and anxiety cause cardiovascular disease or vice versa?: Commentary on Huang et al.

25 Dec 2023 - Elsevier

In the current issue of the American Journal of Geriatric Psychiatry, Huang et al. investigate whether cardiovascular (CV) health at baseline is associated with incident anxiety and depressive disorders at follow-up (median 12.4 years later). They examine a large sample of participants (N > 115,000) from the UK Biobank dataset who were without CV disease or mental illness at baseline

Study protocol for a feasibility study of microinterventions in smartphone-based assessments to reduce depressive rumination

22 Dec 2023 - British Medical Journal

Introduction Depression as well as suicidal ideation and behaviours share several precipitating and maintaining factors and are subject to the influence of overlapping constructs. One of these transdiagnostic constructs is rumination. For the treatment of rumination, a variety of interventions are already available. However, not everyone with a need receives psychotherapeutic treatment

Lonely for Life? Differences between Chronic and Transient Loneliness and their Impact on Depression in Older Adults

22 Dec 2023 - Elsevier

Loneliness is often defined as distress resulting from disparity between desired and perceived social connections [1]. Feelings of loneliness have been described since ancient times and is defined in the literature as an intense desire for kinship and social relationships [2]

The effects of light therapy on sleep, depression, neuropsychiatric behaviors, and cognition among people living with dementia: A meta-analysis of randomized controlled trials

22 Dec 2023 - Elsevier

Sleep and circadian rhythm disorders are prevalent among people living with dementia (PLWD),¹ due to neurodegeneration of the brain regions and alterations in the suprachiasmatic nucleus (SCN) of the hypothalamus.² The SCN serves as a pacemaker, controlling circadian rhythms responsible for activity, sleep, and emotional patterns

Eating disorders symptoms and depressive symptoms in Chinese Tibetan University students: a network analysis

21 Dec 2023 - Biomed Central

Depression is being increasingly acknowledged as a global public health concern, and following this trend, attention towards eating disorders (EDs) has surged within China's national consciousness. EDs symptom...

The relationship between sleep, gut microbiota, and metabolome in patients with depression and anxiety: A secondary analysis of the observational study

20 Dec 2023 - PLOS ONE

by Arisa Tanaka, Kenji Sanada, Katsuma Miyaho, Tomoyuki Tachibana, Shunya Kurokawa, Chiharu Ishii, Yoshihiro Noda, Shinichiro Nakajima, Shinji Fukuda, Masaru Mimura, Taishiro Kishimoto, Akira Iwanami Background Growing attention is paid to the association between alterations in the gut microbiota and their metabolites in patients with psychiatric disorders

Psychosocial determinants of adolescent romantic relationship in Malaysia: Social media use, pornography surfing, sexual and reproductive health knowledge, and depression

20 Dec 2023 - PLOS ONE

by Muhammad Ikhwan Mud Shukri, Anisah Baharom It is socially natural that adolescents engage in romantic relationship. However, there are negative health implications when they are not properly monitored and guided. The engagement in unsafe sexual practices has been reported to cause various adverse health and social implications affecting Malaysian adolescents

Comparing the effectiveness of mother-focused interventions to that of mother-child focused interventions in improving maternal postpartum depression outcomes: A systematic review

20 Dec 2023 - PLOS ONE

by Divya Kumar, Waqas Hameed, Bilal Iqbal Avan Background Most empirically researched interventions for postpartum depression (PPD) tend to target mothers? depression alone. Harmful effects of PPD on physical and mental health of both mother and child has led researchers to investigate the impact of interventions on PPD and child outcomes together

Depression and self-care in diabetes; adjustment for misclassification bias: application of predictive weighting method

19 Dec 2023 - Biomed Central

This study aimed to investigate the association between depression and self-care in diabetic patients potentially influenced by biases in depression measurement using weighting the positive and negative predic...

Optimal cut-offs of depression screening tools during the COVID-19 pandemic: a systematic review

19 Dec 2023 - Biomed Central

Studies have reported an increase in the prevalence of depression during the COVID-19 pandemic. The accuracy of screening tools may change with the prevalence and distribution of a disease in a population or s...

Psychosocial factors of insomnia in depression: a network approach

16 Dec 2023 - Biomed Central

Insomnia symptoms in patients with major depressive disorder (MDD) are common and deleterious. Childhood trauma, personality traits, interpersonal distress, and social support contribute to insomnia, but how t...

Using functional near-infrared spectroscopy to study effects of virtual reality intervention for adolescents with depression in a clinical setting in China: study protocol for a prospective, randomised, controlled trial

15 Dec 2023 - British Medical Journal

Introduction Adolescent depression has been shown to be associated with many devastating psychosocial outcomes. However, there are many barriers that may prevent depressed individuals from receiving specialised treatment. Virtual reality (VR) technology has shown promise as one avenue for overcoming these challenges

Improving Care for Late-Life Depression through Partnerships with Community-Based Organizations: Results from the Care Partners Project

14 Dec 2023 - Elsevier

Evidence from more than eighty randomized controlled trials demonstrates that collaborative care (CC) substantially improves depression outcomes when compared to usual care (1,2). This evidence is particularly strong for older adults with depression and suicidal ideation (3).

Maintenance treatment of psychotic depression: Is antipsychotic medication needed?

13 Dec 2023 - John Wiley & Sons

Acta Psychiatrica Scandinavica, Volume 149, Issue 1, Page 3-5, January 2024.

Relationship between fruit and vegetable consumption and internet addiction with insomnia and depression as multiple mediators during the COVID-19 pandemic: a three-wave longitudinal study in Chinese college students

13 Dec 2023 - Biomed Central

The relationships between fruit and vegetable consumption (FV) and Internet addiction (IA) in college students still remained unknown together with the internal mechanisms. Given the limitations of previous cr...

Preexisting depression and COVID-19: a cohort study on the risk of susceptibility and hospitalization

13 Dec 2023 - Biomed Central

Depression can have negative effects on a person's physical health. However, the available evidence on the risk of susceptibility to COVID-19 and its adverse outcomes in people with mental disorders, including...

Exploring symptom-level associations between anxiety and depression across developmental stages of adolescence: a network analysis approach

13 Dec 2023 - Biomed Central

Anxiety and depression often co-occur during adolescence, but the associations between symptoms of these two disorders in this developmental period are not yet fully understood. Network analysis provides a val...

Comparing the efficacies of transcranial magnetic stimulation treatments using different targeting methods in major depressive disorder: protocol for a network meta-analysis

12 Dec 2023 - British Medical Journal

Introduction Transcranial magnetic stimulation (TMS) over the left dorsolateral prefrontal cortex (IDL PFC) has been widely used as a treatment for major depressive disorder (MDD) in the past two decades. Different methods for localising the IDL PFC target include the '5 cm' method, the F3 method and the neuro-navigational method

Mothers' and birthing parents' experiences with 1-day cognitive behavioural therapy-based workshops for postpartum depression: A descriptive qualitative study

11 Dec 2023 - John Wiley & Sons

Journal of Psychiatric and Mental Health Nursing, EarlyView.

The mediating effect of psychological resilience between social support and anxiety/depression in people living with HIV/AIDS—a study from China

08 Dec 2023 - Biomed Central

Objective To understand the relationship between psychological resilience in social support and anxiety/depression in people living with HIV/AIDS and to verify whether there is a mediating effect. Methods The ...

A study on longitudinal relationship between ultrafine dust and the prevalence of depression

08 Dec 2023 - Biomed Central

Recently, the fine dust problem caused by rapid industrialization and science and technological development has emerged as a severe social issue worldwide. This also increases the interest in its effect on hum...

Anxiety, depression, and their comorbidity among Chinese college students during the COVID-19 lockdown in the post-epidemic era: an online cross-sectional survey

08 Dec 2023 - Biomed Central

The coronavirus disease 2019 (COVID-19) pandemic continues to affect the mental health of college students in the post-epidemic era. We assessed the status and related factors of college students who are vulne...

The role of military service in preventing depression in China: evidence from a nationally representative longitudinal survey

07 Dec 2023 - Biomed Central

Preschool-Onset Major Depressive Disorder as a Strong Predictor of Suicidal Ideation and Behaviors Into Preadolescence

07 Dec 2023 - Elsevier ScienceDirect

Publication date: Available online 7 December 2023
Source: Journal of the American Academy of Child & Adolescent Psychiatry
Author(s): Laura Hennefield, Diana J. Whalen, Rebecca Tillman, Deanna M. Barch, Joan L. Luby

Complicated grief and its relationship with anxiety, depression, and suicidal ideation in older adults in the context of the COVID-19 pandemic in Peru: a cross-sectional analysis

05 Dec 2023 - Biomed Central

Complicated grief (CG) resulting from poor adaptation to the death of a close person may have been related with the presence of other mental health problems in older adults in Peru during the COVID-19 pandemic...

Psychometric validation of the Hospital Anxiety and Depression Scale (HADS) in community-dwelling older adults

05 Dec 2023 - Biomed Central

The Hospital Anxiety and Depression Scale (HADS) is commonly used to measure anxiety and depression, but the number of studies validating psychometric properties in older adults are limited. To our knowledge, ...

The relationship between personality traits and dysfunctional attitudes in individuals with or without major depressive disorder: a case control study

04 Dec 2023 - Biomed Central

Dysfunctional attitudes, which are characterized by distorted self-cognitions, were considered to be linked to personality traits. It was found that certain personality traits may predict dysfunctional attitudes...

Suicidal Behavior in Patients With Major Depressive Disorder

01 Dec 2023 - The JAMA Network

This cohort study examines the outcomes and associated risk factors of suicidal behavior in patients with major depressive disorder.

Maternal Depression, SSRI Use, and Child Brain Trajectories

01 Dec 2023 - The JAMA Network

Maternal depression in pregnancy is common, and selective serotonin reuptake inhibitors (SSRIs) are the most frequently prescribed antidepressant medications used for its treatment. Preclinical studies have shown that gestational SSRI exposure may be adversely associated with offspring brain and behavioral development

Efficacy and Safety of Antidepressants in Patients With Comorbid Depression and Medical Diseases

01 Dec 2023 - The JAMA Network

This systematic review and meta-analysis assesses all available evidence for use of antidepressants in depression comorbid with medical diseases.

[Ketamine for Depression—Knowns, Unknowns, Possibilities, Barriers, and Opportunities](#)

01 Dec 2023 - The JAMA Network

This Viewpoint discusses ketamine and its new and experimentally investigated on- and off-label indications that span different medical disciplines.

[\[back to top\]](#)

Anxiety

[Anxiety symptoms and associated factors among school students after 2 years of the COVID-19 pandemic: a cross-sectional study in Zhejiang Province, China](#)

28 Dec 2023 - British Medical Journal

Objectives To ascertain the prevalence and associated factors of anxiety symptoms among middle and high school students in Zhejiang after 2 years of the COVID-19 pandemic.
Design A school-based cross-sectional study. Setting 30 counties/districts in Zhejiang Province, China. Participants 27 019 students attending middle and high schools

[Dietary eating patterns, dairy consumption, and anxiety: A systematic literature review](#)

28 Dec 2023 - PLOS ONE

by Naimisha Movva, Heidi Reichert, Naushin Hooda, Lauren C. Bylsma, Meghan Mitchell, Sarah S. Cohen Background Nutrition affects both physical and mental health but evidence is mixed regarding potential associations between anxiety and diet, particularly dairy consumption. We conducted a systematic literature review (SLR) of dairy consumption and/or various dietary patterns and risk of anxiety

[Effects of music therapy on degree of cooperation with anesthesia induction and preoperative anxiety in children with simple congenital heart disease: A protocol of systematic review and meta-analysis](#)

27 Dec 2023 - PLOS ONE

by Haoyu Liu, Xiaojin Song, Lu Xiong, Liyun Zhang, Bingquan Luo, Siling Liu Background Anxiety is a common preoperative symptom in children with simple congenital heart disease (SCHD). Music therapy shows potential as a non-drug intervention

[Brief digital self-care intervention for health anxiety in a Swedish Medical University Clinic: a prospective single-group feasibility study](#)

22 Dec 2023 - British Medical Journal

Objectives In routine psychiatric care in Stockholm, Sweden, a comprehensive therapist-guided intervention for clinically significant health anxiety is implemented. However, there is a need for more easily accessible self-care interventions to improve treatment dissemination

[Benefits of cardiac coherence combined with medical hypnosis on preoperative anxiety before cancer surgery: the COHEC II study trial protocol](#)

12 Dec 2023 - British Medical Journal

Introduction Preoperative anxiety is a frequent problem that can lead to complications both during anaesthesia and in the postoperative period, especially in oncology. Studies have shown that it can be managed using non-pharmacological approaches, but few works have evaluated psychoeducational programmes

Higher Intersubject Variability in Neural Response to Narrative Social Stimuli Among Youth With Higher Social Anxiety

07 Dec 2023 - Elsevier ScienceDirect

Publication date: Available online 7 December 2023
Source: Journal of the American Academy of Child & Adolescent Psychiatry
Author(s): M. Catalina Camacho, Dorothy H. Balsler, Emily J. Furtado, Cynthia E. Rogers, Rebecca F. Schwarzlose, Chad M. Sylvester, Deanna M. Barch

Psychosis

Randomised controlled trial of automated VR therapy to improve positive self-beliefs and psychological well-being in young people diagnosed with psychosis: a study protocol for the Phoenix VR self-confidence therapy trial

07 Dec 2023 - British Medical Journal

Introduction The confidence of young people diagnosed with psychosis is often low. Positive self-beliefs may be few and negative self-beliefs many. A sense of defeat and failure is common. Young people often withdraw from many aspects of everyday life. Psychological well-being is lowered

Prevalence of lifestyle cardiovascular risk factors and estimated framingham 10-year risk scores of adults with psychotic disorders compared to controls at a referral hospital in Eldoret, Kenya

05 Dec 2023 - Biomed Central

Lifestyle factors such as smoking, alcohol use, suboptimal diet, and inadequate physical activity have been associated with increased risk of cardiovascular diseases. There are limited data on these risk factors...

[Cat Ownership and Schizophrenia-Related Disorders and Psychotic-Like Experiences: A Systematic Review and Meta-Analysis](#)

02 Dec 2023 - Schizophrenia Bulletin

AbstractBackgroundIt has been proposed that cat ownership may be a risk-modifying factor for schizophrenia-related disorders and psychotic-like experiences (PLE). This study aimed to systematically review and meta-analyze publications that reported the relationship between cat ownership and schizophrenia-related outcomes

[Childhood Area-Level Ethnic Density and Psychosis Risk Among Ethnoracial Minoritized Individuals](#)

01 Dec 2023 - The JAMA Network

This cohort study examines the association between area-level ethnic density during childhood, perceived discrimination, and psychosis risk outcomes among ethnoracial minoritized individuals at clinical high risk for psychosis.

[Network-Based Spreading of Gray Matter Changes in Psychosis](#)

01 Dec 2023 - The JAMA Network

This case-control study models the processes that explain spatial patterns of gray matter volume loss in different stages of psychotic illness and assesses whether certain brain regions act as putative epicenters from which volume loss spreads.

[Social Deprivation and Population Density Trajectories Before and After Psychotic Disorder Diagnosis](#)

01 Dec 2023 - The JAMA Network

This case-control study examines whether patients diagnosed with psychotic disorder or nonpsychotic bipolar disorder differed from a control group in their deprivation and population density trajectories.

[Childhood Adversity Determines the Syndemic Effects of Violence, Substance Misuse, and Sexual Behavior on Psychotic Spectrum Disorder Among Men](#)

29 Nov 2023 - Schizophrenia Bulletin

AbstractBackground and hypothesisChildhood adversity (CA) increases the risk for several adult psychiatric conditions. It is unclear why some exposed individuals experience psychotic symptoms and others do not. We investigated whether a syndemic explained a psychotic outcome determined by CA

[Hypersexuality during treatment with cariprazine in a patient with schizophrenia? A case report](#)

11 Dec 2023 - Biomed Central

Cariprazine is a third-generation antipsychotic with a unique mechanism of action. It functions as a partial agonist with high affinity for dopamine D2 and D3 and serotonin 5-HT1A receptors, an antagonist for ...

[Psychosocial interventions promoting personal recovery in people with schizophrenia: a scoping review protocol](#)

09 Dec 2023 - British Medical Journal

Introduction Personal recovery is an important aspect for many individuals diagnosed with schizophrenia, as people can live rich, fulfilling lives despite ongoing symptoms. Prior reviews have found several factors to be associated with personal recovery, but a comprehensive overview of the psychosocial interventions aimed at improving personal recovery in schizophrenia is needed

[Initial attitudes toward a drug predict medication adherence in first-episode patients with schizophrenia: a 1-year prospective study in China](#)

05 Dec 2023 - Biomed Central

Patients' attitudes toward medication have been shown to be a predictor of nonadherence to antipsychotic treatment. However, most previous studies that explored this relationship used a cross-sectional design....

[Prefrontal Cortical Somatostatin Neurons in Schizophrenia](#)

01 Dec 2023 - The JAMA Network

This case-control study examines mRNA levels of somatostatin (SST) in the dorsolateral prefrontal cortex of postmortem brain specimens from patients with schizophrenia, bipolar disorder, and major depression disorder to assess whether alterations in SST levels are diagnosis specific and associated with cognitive dysfunction.

[Adverse childhood experiences and psychological functioning among women with schizophrenia or bipolar disorder: population-based study](#)

18 Oct 2023 - BJPsych

Background Adverse childhood experiences (ACEs) are well-known risk factors for schizophrenia and bipolar disorder. Aims The aim was to study the associations between specific ACEs and psychological functioning in women with schizophrenia or bipolar disorder. Method Among 29 367 women (mean age 44 years) from the Icelandic Stress-And-Genes-Analysis (SAGA) study, 534 (1

Self-harm

Lived experience codesign of self-harm interventions: a scoping review

27 Dec 2023 - British Medical Journal

Objectives This study aims to map existing literature describing how people with lived experience of self-harm have engaged in codesigning self-harm interventions, understand barriers and facilitators to this engagement, and how the meaningfulness of codesign has been evaluated. Design Scoping review by Joanna Briggs Institute methodology. A protocol was published online (<http://dx.doi.org/10>

Evaluation of a national clinical programme for the management of self-harm in hospital emergency departments: impact on patient outcomes and the provision of care

07 Dec 2023 - Biomed Central

Emergency departments are important points of intervention, to reduce the risk of further self-harm and suicide. A national programme to standardise the management of people presenting to the emergency departm...

Suicide

Suicide trends in Denmark—An ecological study exploring suicide methods from 1995 to 2019

29 Dec 2023 - PLOS ONE

by Agnieszka Konieczna, Christina Petrea Larsen, Sarah Grube Jakobsen, Taro Okuda, Karin Moriyama, Winibaldus Stefanus Mere, Erik Christiansen Suicide is a major public health problem and complex phenomenon, affecting many people around the world. However, the incidence of suicide varies by sex and age, which includes differences in the means used

Systematic Review: The Measurement Properties of the Suicidal Ideation Questionnaire and Suicidal Ideation Questionnaire-Jr.

26 Dec 2023 - Elsevier ScienceDirect

Publication date: Available online 26 December 2023 Source: Journal of the American Academy of Child & Adolescent Psychiatry Author(s): Darren Courtney, Nahid Iseyas, Suneeta Monga, Nancy J. Butcher, Karolin R. Krause, Reena Besa, Peter Szatmari

Suicide and the Law By Elizabeth Wicks Hart Publishing. 2022. £85.00 (hb). 232 pp. ISBN 9781509932702

22 Dec 2023 - BJPsych

Do humour styles moderate the association between hopelessness and suicide ideation? A comparison of student and community samples

18 Dec 2023 - PLOS ONE

by Aaron C. Drake, Christopher R. Sears Research has found that humour styles can moderate the relationship between various facets of mental health and well-being. Most of these studies have used college student samples, however, and the generalizability of these findings has not been firmly established

Electroretinography and suicidal behaviors: a systematic review

15 Dec 2023 - Biomed Central

Electroretinogram (ERG) is one of the tools used to investigate the electrophysiological underpinnings of mental health illnesses and major clinical phenomena (e.g., suicide) to improve their diagnosis and car...

Is late-onset suicidal behavior a distinct subtype?

15 Dec 2023 - Elsevier

Contrary to the lay belief that suicidal behavior in late life may represent a rational attempt to end life while preserving dignity, studies have demonstrated that depression has been strongly associated with suicidal behavior in old age^{1,2}. However, both late-life depression³ and late-life suicidal behavior are highly heterogeneous⁴

Cyberbullying victimization and suicidal ideation among in-school adolescents in three countries: implications for prevention and intervention

14 Dec 2023 - Biomed Central

Countries in South and Central America and the Caribbean are among the countries with the highest adolescent cyberbullying crimes. However, empirical evidence about the effect of cyberbullying victimization on...

Advancing Suicide Intervention Strategies for Teens (ASSIST): study protocol for a multisite randomised controlled trial

12 Dec 2023 - British Medical Journal

Introduction Brief interventions that reduce suicide risk following youth's experience with acute care due to suicidality are needed. **Methods and analysis** The study will use a three-arm randomised controlled trial designed to test the effectiveness of the Safety Planning Intervention with structured follow-up (SPI+) and the Collaborative Assessment and Management of Suicidality (CAMS) compared

What do older people who have attempted suicide experience? Study protocol for a qualitative meta-synthesis among older adults, family caregivers and healthcare professionals

09 Dec 2023 - British Medical Journal

Introduction Attempted suicide among older adults represents a significant mental health concern that has witnessed a rising incidence within this demographic in recent years. Research indicates that attempted suicide among the older population serves as a primary risk factor for completed suicide

Effect of synchronous remote-based interventions on suicidal behaviours: protocol for a systematic review and meta-analysis

06 Dec 2023 - British Medical Journal

Introduction Suicide is among the leading causes of preventable death worldwide. The impact of suicide affects the personal, social and economic levels. Therefore, its prevention is a priority for public health systems. Previous studies seem to support the efficacy of providing active contact to people who have made a suicide attempt

Attention Deficit Hyperactivity Disorder

Correction: Knowledge and attitudes on attention deficit hyperactivity disorder (ADHD) among school teachers in Anuradhapura district, Sri Lanka: a descriptive cross-sectional study

15 Dec 2023 - British Medical Journal

Wijerathna N, Wijerathne C, Wijeratne H, et al. Knowledge and attitudes on attention deficit hyperactivity disorder (ADHD) among school teachers in Anuradhapura district, Sri Lanka: a descriptive cross-sectional study. *BMJ Open* 2023;13:e080039. doi: 10.1136/bmjopen-2023-080039 This article was previously published with an error

Lisdexamphetamine versus methylphenidate for paediatric patients with attention-deficit hyperactivity disorder and type 1 diabetes (LAMAinDiab): protocol for a multicentre, randomised cross-over clinical trial in an outpatient telemedicine-supported setting

12 Dec 2023 - British Medical Journal

Introduction Attention deficit hyperactivity disorder (ADHD) affects 5%–10% of paediatric population and is reportedly more common in children with type 1 diabetes (T1D), exacerbating its clinical course. Proper treatment of ADHD in such patients may thus provide neurological and metabolic benefits

Shared and Distinct Neurobiological Bases of Bipolar Disorder and Attention-Deficit/Hyperactivity Disorder in Children and Adolescents: A Comparative Meta-analysis of Structural Abnormalities

08 Dec 2023 - Elsevier ScienceDirect

Publication date: Available online 8 December 2023 Source: *Journal of the American Academy of Child & Adolescent Psychiatry* Author(s): Yajing Long, Nanfang Pan, Yifan Yu, Shufang Zhang, Kun Qin, Ying Chen, John A. Sweeney, Melissa P. DelBello, Qiyong Gong
