
[Behavioural Science and Insights Unit Weekly Literature Report](#)

11th February 2022: Week 87

The report aims to highlight a selection of COVID-19 related work in the field of behavioural and social science (mostly) released from the 4th - 11th February 2022. Please note the report is not a perfect product and the inclusion or omission of a publication should not be viewed as an endorsement or rejection by UK Health Security Agency. Additionally, the authors of this report do not accept responsibility for the availability, reliability or content of the items included in this report and do not necessarily endorse the views expressed within them.

Highlights

As we know how time pressured everyone is, the authors of the digest have selected three recommended items from the lists below.

This week these are:

1. [Who is engaging with lateral flow testing for COVID-19 in the UK? The COVID-19 Rapid Survey of Adherence to Interventions and Responses \(CORSAIR\) study](#), Louise E Smith et al., BMJ Open, 10th February 2022.
 2. [Who helps and why? A longitudinal exploration of volunteer role identity, between-group closeness, and community identification as predictors of coordinated helping during the COVID-19 pandemic](#), Juliet Wakefield et al., British Journal of Social Psychology, 4th February 2022.
 3. [Has covid-19 precipitated the end of the family doctor?](#), Kieron Cooney, The BMJ, 4th February 2022.
-

Research Papers

Pre-prints (not peer-reviewed)

[Crowdsourcing interventions to promote uptake of COVID-19 booster vaccines](#), Robert Böhm et al., PsyArXiv Preprints, 10th February 2022.
